Crop Year 2015

Issued March 2015

Duster Remains Top Wheat Variety for 4th Year Running

Duster is the number one wheat variety in Oklahoma for the fourth year in a row. Endurance remains the second most commonly planted wheat variety in Oklahoma. This survey was conducted by the USDA-NASS Oklahoma Field Office and funded by the Oklahoma Wheat Commission in cooperation with the Department of Plant and Soil Sciences at Oklahoma State University. Results were based on reports from Oklahoma wheat growers in the December Agriculture Survey or the Cropland Acreage and Production Survey.

¹ Prior to 2013, data were collected through mail and telephone responses. Due to agency program changes, the 2013 and subsequent data will be collected only through telephone interviews. ² The significant increase in the "Unknown" categories, especially the "Unknown Hard" category is attributed to the change in data collection methodology and an increase in sample size. ³ Includes varieties with less than .2% or fewer than three reports in 2015. ⁴ Includes spring varieties. ⁵ Unknown contains unspecified varieties that were included to account for acreage. * Less than 0.2 percent.
